Conference ID: 13727097

Please call 5-10 minutes before the scheduled start time and ask for the Chemomab conference call.

About Chemomab Therapeutics

Chemomab is a clinical-stage biotechnology company focusing on the discovery and development of innovative therapeutics for fibrotic and inflammatory diseases with high unmet need. Based on the unique and pivotal role of the soluble protein CCL24 in promoting fibrosis and inflammation, Chemomab developed CM-101, a monoclonal antibody designed to bind and block CCL24 activity. CM-101 has demonstrated the potential to treat multiple severe and life-threatening fibrotic and inflammatory diseases. It is currently in two Phase 2 safety and efficacy trials—one in patients with primary sclerosing cholangitis and the second in patients with liver fibrosis, with a third Phase 2 trial in systemic sclerosis expected to begin in early 2022. For more information on Chemomab, visit chemomab.com.
